

Green Initiatives Continue in Seating Category.....Saves Green!

Salamander Designs was recently faced with increasing the pre-paid freight levels of Theater Seating products. After considerable re-engineering, Salamander has developed a way to reduce container sizes of the Matteo and Talia Theater Chairs. This will decrease the freight class of these seats, allowing us to maintain the \$2500 prepaid level.

Effective immediately, both the Matteo and Talia will be shipped with a Ready-to-Assemble (RTA) seat back. This seat back will be easily affixed to the chair for quick and precise installation. These changes also make the chairs easier to transport into the customer's home and assemble multiple chairs in rows.

Installation instructions will be included with each chair box, as well as on the Salamander Portal and website: www.salamanderdesigns.com.

Best regards,

The team at Salamander Designs
