

Screen Innovations Has **Moved!**

~ Austin, Texas-Based High-End Projector Screen Company Now Occupies New Building Due to Growing Product Lines & Need for Increased Manufacturing, Demo, and Engineering Space ~

Austin, Texas, Oct. , 2009 – Screen Innovations is proud to announce that it has moved into a larger facility as of Oct. 25. SI's new corporate address is 2105 Denton Dr., Suite 100, Austin, Texas 78758.

“We feel very fortunate to be enjoying unprecedented growth in a time when many companies are being forced to restructure or downsize,” explained Ryan Gustafson , SI president. “Our new, larger facility is essential for our expansion into the commercial market with our new Black Diamond Venue line of large projector screens. The new facility more than triples our production capacity for Black Diamond and all other SI projection screen products.”

A new state-of-the-art test lab, R&D, and training rooms have been incorporated into the new site, thus allowing SI to develop, produce, and distribute from one site.

“With more than 100 new dealers added to our growing family in September alone, our move into a larger facility could not have come at a better time,” said Blake Vackar, SI director of sales. “With the additional support of our expanded staff, SI dealers will continue to enjoy quick turn around on all orders even as we continue to grow our business in the domestic and international marketplaces.”

For more information on Screen Innovations and its complete product line, visit the web at www.screeninnovations.com or call 512-832-6939.

SI is a technology based U.S. projector screen manufacturer focused on delivering "state-of-the-art" performance. Each screen we produce meets exceedingly tight tolerances and delivers the stunning visuals we require.
